

To whom it may concern: I am a XM radio subscriber, and as such I pay for the privelege of listening to what I want, and what I want is music of my choice, local weather, and local traffic updates free of any commercials. I would think at this point in our history, our elected officals would have more to do trying to make this country safe than spending time listening to the lobbying on behalf of some radio broadcasters. I Urge you to reject this blatant attempt to dictate what I am allowed to hear.
